Architecture +AI Category - Special Mention

onE.Globe

THE ART OF SUSTAINABLE WELLBEING

At onE.Globe, we blend sustainable luxury with forward-thinking design to create iconic, high-performance spaces that elevate brands and living environments. Our approach integrates artistry, innovation, and eco-friendly practices to craft environments that inspire and endure.

- We start with in-depth client interviews to discover, understand, or help create your unique vision.
- We leverage Generative AI and computational design to rapidly create multiple design alternatives.
- Using a streamlined BIM workflow, we efficiently produce permit and construction documents, refining details with virtual reality to ensure precision.

<https://www.linkedin.com/company/one-globe>

onE.Globe is revolutionizing real estate, architecture, and interior design through AI-assisted computation. Our custom workflow simplifies the design process by integrating realistic imagery and 3D models, allowing us to efficiently develop concepts and bring visionary ideas to life.

We then seamlessly translate models into precise permit and construction drawings, delivering results far more efficiently than industry standards—thanks to two decades of experience in developing best practices and harnessing diverse technical and design expertise.

We unlock the hidden potential of properties with innovative architecture, optimizing time and costs while creating tailored, one-of-a-kind spaces through global insights and local expertise.
